

# RESIDENTIAL WINDOW BY MARK LEVY COMMEMORATES 9/11

*by Mark Levy*

Thematically, the long, teal-colored element is the World Trade Center; the smaller rectangular and square shapes represent the surrounding buildings; the large green disc is the earth, and the smaller circles the other planets. The blood-red fulcrum at the bottom that throws everything out of whack in the universe (hence the planetary references) is the blood on the hands of the hijackers and Bin Laden.
